

First Steps Toward RDA

NJLA Annual Conference, Jun 4, 2013

What This Talk Covers:

- The “what” and “why” of RDA
- Changes in MARC cataloging
- BIBFRAME

What is RDA?

- Resource Description and Access
- Replaced AACR2 as the American cataloging standard as of March 31, 2013
- Not designed for MARC format, though modifications have been made for MARC
- Designed with the FRBR model in mind (Functional Requirements for Bibliographic Records)

Why RDA?

- Presumes a future “Semantic Web” environment
- AACR2 inadequate for cataloging virtual resources
- Should one day be cross-compatible with digital metadata
- Goal is to provide user with maximum amount of information about “works” and their creators

FRBR User Tasks

- Find
- Identify
- Select
- Obtain
- Understand

(See RDA 0.4.2)

FRBR Class I Entities

- Work
- Expression
- Manifestation
- Item

RDA is modeled on these Class I entities, and the relationships between them.

Work

- A distinct written, recorded, or artistic creation
- The creation before it is produced in any way as a published book, recorded music, or a film (or anything else).

Expression

- "the specific intellectual or artistic form that a work takes each time it is 'realized.'" (IFLA FRBR document)
- The “work” in the creator’s head once it is written down/recorded/filmed/etc. in some form.

Manifestation

- "the physical embodiment of an expression of a work." (IFLA FRBR document)
- The book/music/film as it is published in hardcover or paperback, produced as a DVD or other format, produced as a CD or other format (etc.)

Item

- "a single exemplar of a manifestation."
(IFLA FRBR document)
- That book, DVD, CD, database, etc. as you have it in your library collection, and need to catalog it.

When describing a facsimile or reproduction, record the elements describing the carrier of the facsimile or reproduction.

For instructions on recording a relationship to the original manifestation, see 27.7 [RDA](#) (related manifestation).

3.1.4 Resources Consisting of More Than One Carrier Type LC-PCC PS

When preparing a comprehensive description for a resource consisting of more than one carrier type, apply the method that is appropriate to the nature of the resource and the purpose of the description:

- a) record only carrier type and extent of each carrier (see 3.1.4.1 [RDA](#))
- or*
- b) record carrier type, extent, and other characteristics of each carrier (see 3.1.4.2 [RDA](#))
- or*
- c) record the predominant carrier type and extent in general terms (see 3.1.4.3 [RDA](#)).

Record additional characteristics of particular carriers if considered important for identification or selection (see 3.6 [RDA-3.20 RDA](#)).

For instructions on recording information about the carrier of accompanying material, see 27.1 [RDA](#) (related manifestation).

For instructions on recording extent for a comprehensive description of a collection, see 3.4.1.11 [RDA](#).

3.1.4.1 Recording Only Carrier Type and Extent of Each Carrier

If a detailed description of the characteristics of the carriers is not considered necessary, record only

- a) the applicable carrier type or types (see 3.3 [RDA](#))
- and*
- b) the extent of each type of carrier (see 3.4 [RDA](#)).

What's Different from AACR2?

- ISBD punctuation not required
- Relationship indicators on author access points (e.g., 100 1_ \$a Smith, John, \$e editor)
- New publication info field
- No more GMDs ;“content and carrier info”
- Free-for-all on notes and analytical titles (within MARC record limits) – “Write down what you see.”

What's Different from AACR2?

- Most wording is spelled out, and translated into English :
 - p. becomes “pages”
 - ill. and variations become “illustrations”
 - cm. remains “cm.”
 - [S.I.] becomes [Place of publication not identified]
 - [s.n.] becomes [Publisher not identified]
 - O.T. and N.T. (Bible) are now spelled out

AACR2 vs. RDA (from LC examples)

-
- RDA record:
-
- 245 \$a Healthy vegetable recipes for your heart / \$c by Dr. Margaret Norton, Iowa State University, Dr. Leslie David, Arcadia University, Dr. Robert McCloud, Williams College, and Dr. Katherine Boone, University of Nebraska--Omaha.
- 246 \$i Corrected title: \$a Healthy vegetable recipes for your heart
- 250 \$a First edition, revised and enlarged.
- 260 \$a Pittsburgh, Pennsylvania : \$b Healthy Living Publishing Company, \$c 2010.
- 300 \$a 188 pages : \$b illustrations, photographs (some color) ; \$c 26 cm.
- 490 \$a Healthy Living recipe series ; \$v volume 12
-
- AACR2 record:
-
- 245 \$a Healthy vegetable [i.e. vegetable] recipes for your heart / \$c by Margaret Norton [et al.].
- 250 \$a 1st ed., rev. and enl.
- 260 \$a Pittsburgh, Pa. : \$b Healthy Living Pub. Co., \$c 2010.
- 300 \$a 188 p. : \$b ill., photos. (some col.) ; \$c 26 cm.
- 490 \$a Healthy Living recipe series ; \$v v. 12

Fixed Field Change

- Desc. code is “i” if you use ISBD punctuation. Otherwise it is blank.
- This was coded “a” for AACR2 previously
- Also known as Leader position 18 (Descriptive Cataloging Form)

Variable Field Changes

250 field

- The 250 field (edition statement) is now repeatable.
- Edition statements are now spelled out:

First edition

Second revised edition

Fiftieth anniversary edition

Exception: if it is not spelled out on the item

Field 264

- Breaks out info into multiple fields, rather than 1 260 field.
- First indicators 2 (intervening) and 3 (current/latest)
- Second indicators 0-4 “function of entity”:
 - 0 – Production
 - 1 – Publication
 - 2 – Distribution
 - 3 – Manufacture
 - 4 – Copyright notice date

Difference Between 260 and 264

- “Information in field 260 is similar to information in field 264. Field 260 is useful for cases where the content standard or institutional policies used do not make a distinction between functions.” (OCLC Tech Bulletin 26 I)
- It is acceptable to continue using 260, however, current practice seems to be to use the 264, 2nd indicator 1

Field 300

- Items are now spelled out in 300 field.

AACR2 way: xi, 398 p. : ill. ; 23 cm.

RDA way (with ISBD): xi, 398 pages : illustrations ; 23 cm.

Most dimensions (minutes, size, etc.) are not spelled out.

Fields 336, 337, and 338

Solution to Authority Problems

- A field 700 was added to authority records with more “complete” forms of names established in AACR2
- These 700’s were “flipped” to become 400’s (see references). Most AACR2 authority names stayed the same.

Editing in OCLC

- Do not change AACR2 records to be RDA records
- Serials: if there are title or publisher changes, create a new RDA serial record
- NACO authorized catalogers should update authorities to RDA as they come across them

BIBFRAME

- Bibliographic Framework Transition Initiative

<http://bibframe.org/>

- Beginning of work on replacing MARC format
- Works heavily with MARC now because there are over 2 billion MARC records
- Goal is to create new format incorporating RDA and other standards
